

Abdeladim BOUITA

Software & Security Engineer

☎ + (212) 6 79 13 53 61 @ Abdeladim91@gmail.com in Abdeladim Bouita

Full-stack software engineer with expertise in **Java, PHP, Laravel**, capable of designing and delivering scalable, secure, and user-friendly applications. Skilled in both front-end and back-end development, database design, and API integration. Adept at problem-solving, optimizing performance, and collaborating in agile teams. Brings strong attention to detail and a solid foundation in information systems security as an added value.

★ SKILLS

Programming	Java, PHP, JEE, JavaScript, Python, C++, C.
Frameworks and Tools	Laravel, WordPress, Angular (basics), Bootstrap, jQuery, Git.
Data bases	MySQL, PL/SQL
Web Development	HTML5, CSS3, REST APIs, JSON, XML.
Operating systems	Ubuntu, Windows Server.
Security	Secure coding practices, ISO 27001 basics, cryptography fundamentals.
Network	Advanced Administration of Computer Systems and Networks (Ad hoc, IPv6, IPv4, Quotas...)

📁 EXPERIENCES

Present Jan 2024	Support Engineer, SOFRECOM, RABAT <ul style="list-style-type: none">› Collaborate with development teams to troubleshoot and enhance internal applications.› Maintain and update back-office systems ensuring smooth functionality and usability.› Develop small features and fix bugs in PHP and MySQL-based tools.› Improve workflows and documentation to support efficient software delivery.
Dec 2023 Aug 2023	Support Engineer Intern, SOFRECOM, RABAT <ul style="list-style-type: none">› Assisted in developing internal dashboards using PHP and Bootstrap.› Created SQL queries and automated reports to improve data accessibility.› Participated in UI/UX enhancements for existing applications.

🎓 EDUCATION

2020-2022	Master — Information Systems Security , ENSA Kenitra, Ibn Tofail University.
2019-2020	Bachelor — Information and Communication Systems Development , Meknes, Moulay Ismail University.
2017-2019	University Diploma of Technology — Software Engineering , Meknes, Moulay Ismail University.

📁 PROJECTS

Nov 2022	Secure Authentication in Vehicular Ad-hoc Networks (VANET), ENSA, kenitra <ul style="list-style-type: none">› Designed a proof-of-concept for secure communication between vehicles.› Applied encryption and digital signatures to enhance security. <div>Python C++ XML</div>
Jul 2021 Oct 2021	Dynamic Website Development, DevPANI, Rabat <ul style="list-style-type: none">› Built a Laravel-based website with full database integration.› Implemented authentication, CRUD operations, and responsive UI. <div>PHP Laravel Bootstrap MySQL</div>
